

# Project Proposal

**Proposal Title: Arimo Burn Rehab**

**Proposal Number:** 1474

**DWR Region:** Northern Region

**Lead Agency:** Private

**County:** Box Elder

**Project Manager:** Troy Forrest

**PM Phone:** 0

**Regional Priority:** High

**Project Type:** Terrestrial Habitat

**Proposed Start Date:** 7/1/2009

**Project Location:** Rosebud, Utah

**Project Description:** plant a burn to rehab winter mule deer and sage grouse habitat.

**Description of Problem/Need:** To restore winter range for mule deer and sage grouse that was lost in a fire, 170 acres will be seeded. Winter range is important in this area.

**Objectives:** to restore winter range

**Relevance to Strategic Plans:** This project will address the needs of conservation of the Tier II and Tier III species noted in the WAP identified in section 5.1, and also address the need for protection and restoration of the habitat types listed in section 7.1 of the WAP.

**Potential Risks:** annual grass invasion

**Proposed Methods:** using a wildlife seed mix, drill into burn with rangeland drill.

**Shapefile Name:** HPD 2010\GIS Proposals\NR\1474.shp

**Seed Source:** GBRC

UPCD Reg Team Coord Date: 1/14/2009

**Proposed  
NEPA Action:**

**Proposed Arch Action:**

☐ **Vegetation Monitoring**      ☐ **Wildlife Monitoring**

**Monitoring Information:**

**Grazing Management:** grazing will be suspended for 2 years

### SPECIES BENEFITING

## Mule Deer
